Human dignity · Unlock innovation · Moderate speech risks · Accountable narrow rules · Nation leads vs rivals

OPENING FRAME → START HERE

AI is a powerful tool — not a person and not a god. Govern it for human dignity, free speech, and American leadership under law.

HUMAN PATH

H

HUMAN DIGNITY

Imago Dei: people bear moral agency; models do not. “The AI decided” is evasion.

U

UNLOCK INNOVATION

Lead in compute and talent or be ruled by those who do — especially the CCP.

M

MODERATE SPEECH RISKS

AI intermediaries can become censorship machines. Demand pluralism and contestability.

A

ACCOUNTABLE RULES

Regulate concrete harms and uses — not a vague super-regulator for all cognition.

N

NATION OF FORMED MINDS

Train humans to verify and judge. Don’t outsource wisdom to autocomplete.

COUNTERS

THEY SAY

“Pause AI or we all die”

YOU SAY

Speculative doom ≠ blank check for a regulator class while adversaries sprint. Focus on concrete misuse.

THEY SAY

“We need one global AI authority”

YOU SAY

Global bodies often launder unfree values. Prefer democratic law and alliances of free nations.

THEY SAY

“Bias means tight control”

YOU SAY

All systems have bias. Competition and transparency beat one sanctioned orthodoxy.

THEY SAY

“AI should have rights”

YOU SAY

Rights attach to persons. Tools get rules for use — not citizenship.

CLOSE → → Hold both: AI is powerful AND humans stay central. Memory hook: HUMAN.
